Preface

I like birds and spend a bunch of free time staring at birds. I created this book to store all my bird lists.

If you're interested in birds and are based in Kenya please consider using the Kenya BirdLasser app. It helps you document sighting but provides important inputs to conservation and scientific efforts. You can download the app [here](#) and check out all the cool stuff they do [here](#).

Chapter 1

Introduction

This is the first real chapter.

Chapter 2

Diving In

Now let's talk details.

Chapter 3

Technical Details

Now I'll teach you some crazy math, but I need to work it out first...
